RE: Universal White Cement

To Whom It May Concern:

Shasta Industries Commercial & Olympic Division has been installing Universal White Cement's Finest Finish White products for approximately 6 years. The product has consistently exceeded our expectations. We selected the product because of the ultra white color of the finish and the strength and durability that we have come to expect from Universal White Cement. In our experience it is the strongest and most durable marble based finish available. During the time we have been using the product it has been a problem free product for our company. The product was installed in many commercial and semi commercial pools, including the JW Marriott at Desert Ridge, where we installed over 40,000 square of Finest Finish White in the various pools and spas. We have also installed the product in many schools, public parks, and hotel applications. The product is easy to handle and install because it is pre-bagged and pre-mixed which has helped to reduce errors in material mixing. We recommend Universal White Cement's Finest Finish White in commercial applications for anyone looking for a high quality, easy to use, long lasting product.

Thank you,

A handwritten signature in blue ink, appearing to read "Curt Lonsdale". The signature is fluid and cursive, with a large initial "C" and "L".
