

ADVANCED QUARTZ SERIES™

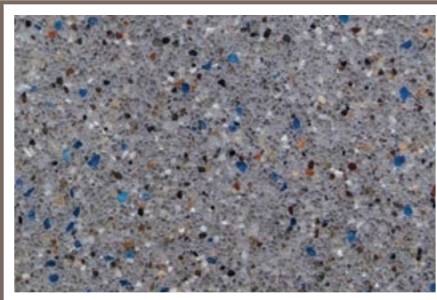

*An Eco-friendly
exposed quartz solution
for your pool and spa project*

Advanced Quartz Series™ is a finer, smoother quartz product providing a luxurious texture experience. Six beautiful colors combined with blue quartz accents and abalone shell add visual interest to your pool water reflection.

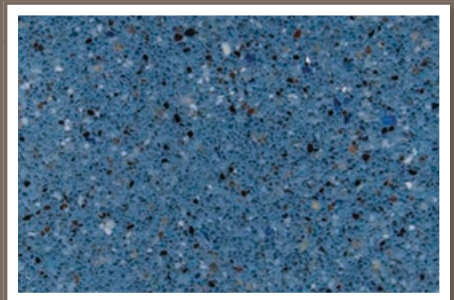

The simplicity of this new exposure method and our custom pre-blended product, ensure the quality control of all our high-performance ingredients and integrity for a long-lasting pool interior finish. This blend uses less cement, resulting in less wasted cement, therefore makes it a more eco-friendly product.

"THE FINISHING TOUCH"

LIQUID DEACTIVATOR FOR
QUARTZ FINISHES

Liquid Exposure Control – 5-gallon bucket. Use in spray container. It covers up to 1500 sq ft. Repeat for additional exposure and reveal.

- *Advanced Pebble Solutions (APS) method is recommended for best results. Do not fill pool immediately after APS exposure, wait 1 day. This helps with hydration of pool finish and minimizing plaster dust.*
- *Brush washing is recommended.*
- *Performs in hot and cold conditions.*

Training & Technical support has been provided by Advanced Pebble Solutions.
