

**Extending the time of the set ensures greater control of the finished product.**

**Universal Ice** is a set delay that unlike many others does not negatively impact the strength or the integrity of the cement in the finished product.

# UNIVERSAL ICE

SET DELAY  
(controls set time)

## MIXING INSTRUCTIONS:

Use 1-5 scoops as needed, add SET DELAY directly into the mixture immediately after the first bag of cement, rock or sand has been added into the mixer.

**Note:** Temperature, humidity and substrate absorption capability will constitute the optimum dosage of each project.

**Maximum Dose:** 5 scoops per 1000 lb. batch

**WARNING:** This product contains components known to cause birth defects, respiratory and reproductive harm. Use protective clothing, eyewear, HEPA respirator and gloves. Wash any affected area with soap and water. If product comes into contact with eyes, flush continuously for 15 minutes and seek immediate medical attention if irritation persists after flushing.

**CAUTION: PROTECTIVE EYEWEAR AND RESPIRATOR MUST BE WORN AT ALL TIMES WHILE USING THIS PRODUCT**
